Class A2: "Rethinking Social Science in an Age of Rupture: Viable Futures for Democracy, Prosperity, and Sociality within Ecological Limits". (Marie Curie room)

This session invites Class A2 members to reflect critically on the role of the social sciences in addressing today's defining challenges. Rather than only diagnosing crises, how can our disciplines actively shape alternative futures?

Rob van Tulder, MAE, Erasmus University Rotterdam, The Netherlands

Growth and beyond: Social innovation, sustainable prosperity, and global public goods

Jonathan White, MAE, London School of Economics, London, United Kingdom

Democratic resilience and climate breakdown

Chris Hann, MAE, Max Planck Institute, Halle, Germany

Neoliberal economy, involuntary mobilities, and the populist threat

Antje Wiener, MAE, University of Hamburg, Germany

From ruptures to a new global order

Class B: Brief presentations by new members, continued. (Ramon y Cajal room)

Class C: Highlight talks from new members in each section (Auditorium)

Introductions by the Section Chairs

11:20 -11:45 Julia Vorholt, MAE, ETH Zurich, Switzerland

Establishing causality: Opportunities of synthetic communities for plant microbiome research

Chair: Ray Dixon, MAE, John Innes Centre, Norwich, United Kingdom

11:45-12:10 Jiri Friml, MAE, ISTA, Vienna, Austria

Rewriting the Rules of Plant Signalling: The Surprising Role of cAMP

Chair: Crisanto Gutierrez, Centro de Biología Molecular Severo Ochoa, Madrid, Spain

12:10-12:35 Monica Di Luca, MAE, University of Milan, Italy

Dynamic synapses and the long arm to the nucleus

Chair: Balázs Gulyás, MAE, Karolinska Institute, Stockholm, Sweden

12:35-13:00 Milan Chytrý, MAE, Masaryk University, Czech Republic

Panel Theme: Democracy, Prosperity, and Sociality within Planetary Boundaries

This high-level, interdisciplinary plenary brings together perspectives from the natural and social sciences and humanities to consider how societies can live well within planetary boundaries. Rather than seeing ecological limits as constraints, how might they serve as catalysts for democratic renewal, equity, and innovation? Transforming the way we live requires more than technological fixes—it calls for approaches that are culturally grounded, inclusive, and responsive to lived realities. Experiences such as vaccine uptake highlight the limitations of top-down strategies. Climate change, as an anthropogenic and socially embedded phenomenon, illustrates how well-intended actions can produce unintended consequences. Here, the social sciences play a critical role in shaping just and viable pathways forward.

16:30–17:30 Open session organized by the Young Academy of Europe (YAE)

Public trust in science and navigating political tensions

Public trust in scientists can help policymaking institutions to decide on the basis of available evidence, but we witness recent political hostilities towards research institutions, and academic freedom and integrity. Indeed, the boundary between science and politics has always been contested, with some seeking to harden this boundary, while others see it as more malleable. And at the same time, most people today trust scientists and agree that they should engage more in society. Against this background, this panel will host multiple perspectives on how scientists – as individuals and as a group - navigate social and political polarization on the role and organisation of science in Europe today. To the extent that scientists work within a politicised context, what affordances and strategies do they deploy to establish science's role in society and relate to political trends.

Moderator: Scott Bremer, president of YAE, University of Bergen, Norway

Panelists:

1. Ruth Rodríguez-Martínez (SH), Pompeu Fabra University, Barcelona, Spain
2. Anna Kuppuswamy (LS), YAE, University of Leeds, United Kingdom
